Flexi - Light

UNIQUE

Unique solution by means of such physical dimensions and requirement of no extra connections to computers, DMX or similar control boards .

COMPACT

Requirement for optimum sized installation volume has been achieved by a compact control unit as a regular wall switch.

FRIENDLY USE + INTERACTIVE

The FLEXI LIGHT system is very simple programmable solution that gives chance to prepare desired colour easily.

FLOURESCENT / LED DRIVE + 1-10V ANALOGUE CONTROL

Capable of controlling both RGB florescent and LED based systems including especially power LEDs with same system.

0-100% DIMMING

Visually controllable dimming range between 0 to 100% preciously with the accuracy of 1%.

10 PROGRAMME

The system gives chance to set 10 different desired colours. You can set one of these preset colours to be displayed permanently or with delayed cycles from 0 seconds to 99 minutes.

60 UNITS CONTROLLING

According to the chosen fluorescents and LEDs, this system can control up to 60 luminaries, which means for fluorescents up to 180 pieces.
